

HANDS-ON WORKSHOP ON CROSS-PLATFORM APP DEVELOPMENT WITH FLUTTER & FIREBASE

Department of Computer Science & Engineering (AI & ML)

Anjuman-I-Islam's M. H. Saboo Siddik College of Engineering, Byculla, Mumbai

7 October 2026 (Wednesday) | 2:00 PM onwards | Computer Lab 2 (L2), 5th Floor, AIML Dept.

ANCHOR: [Anchor Name]

Running time (anchor portions only): Opening & Recitation ~3 min · Felicitation ~3 min · Programme & Speaker Introduction ~4 min · Conclusion & Vote of Thanks ~5 min = **about 15 minutes**

OPENING & RECITATION

~3 min

ANCHOR

Assalamu Alaikum wa Rahmatullahi wa Barakatuh.

A very good afternoon to our respected Principal, Dr. Mohd Shafi Pathan Sir; our respected Head of Department, Dr. Jameer Kotwal Sir; our distinguished guest speaker, Mr. Muhammad Zakaullah; our workshop coordinators, Dr. Muhib Lambay Sir and Prof. Sharique Ahmad Sir; all the faculty members; and my dear students of Third Year CSE (AI & ML).

We warmly welcome you all to this **Hands-On Workshop on Cross-Platform App Development with Flutter & Firebase**, organized by the Department of Computer Science & Engineering (AI & ML), Anjuman-I-Islam's M. H. Saboo Siddik College of Engineering, in association with WISETECH MEP Consultants Pvt. Ltd.

This workshop is part of our department's outcome-based learning and industry interaction initiative, and we are grateful to our patrons for their constant support: Dr. Zahir Kazi, Padma Shri Awardee 2024 and President of Anjuman-I-Islam; Dr. Shaikh Abdullah and Mr. Moiz Miyajiwala, Vice Presidents; Dr. Vikhar Ahmed Khan, Chairman; and Dr. Mohiuddin Ahmed, Director.

To begin this programme on a blessed note, I would like to invite [Name] for the recitation of the Holy Quran.

(Quran recitation takes place)

JazakAllahu Khair for that beautiful and blessed recitation.

FELICITATION

~3 min

ANCHOR

We now move to the felicitation of our esteemed dignitaries as a mark of honour and respect.

May I first request our respected Principal, Dr. Mohd Shafi Pathan Sir, to kindly come forward and felicitate our distinguished guest speaker, Mr. Muhammad Zakaullah.

(Principal presents bouquet / memento to the Guest Speaker)

Thank you, Sir.

May I now request our respected Head of Department, Dr. Jameer Kotwal Sir, to kindly come forward and felicitate our respected Principal.

(HoD presents bouquet / memento to the Principal)

Thank you, Sir.

And may I request our workshop coordinators, Dr. Muhib Lambay Sir and Prof. Sharique Ahmad Sir, to kindly come forward and felicitate our respected Head of Department.

(Coordinators present bouquet / memento to the HoD)

Thank you, Sirs. Please, a warm round of applause for all our dignitaries.

INTRODUCTION OF THE PROGRAMME

~2 min

ANCHOR

Look at the phone in your pocket. Almost every service we use today, from banking and food delivery to our college portals, reaches us through a mobile app. Companies today want those apps on Android, on iOS and on the web, and they want them built fast.

This is exactly where **Flutter** comes in. Flutter is Google's open-source framework that lets developers write a single codebase in the Dart language and run it across multiple platforms. Combined with **Firebase**, Google's backend platform for authentication, databases and cloud services, a single developer can take an idea all the way to a working, data-driven app.

Today is not a lecture. It is a **hands-on workshop**, so your laptops should be open and your Flutter setup ready. By the end of this session, you will be able to:

- Develop cross-platform mobile applications using Flutter
- Integrate Firebase services into Flutter applications
- Implement user authentication using Firebase
- Perform CRUD operations using Cloud Firestore
- Build interactive, data-driven mobile applications

A quick reminder: attendance is being recorded, and active participation is expected throughout the session. If anyone has not yet completed the pre-workshop setup (Git, VS Code, the Flutter extension and the Flutter SDK), please let a volunteer know so we can help you while the session is underway.

INTRODUCTION OF THE SPEAKER

~2 min

ANCHOR

It is my honour and privilege to introduce our distinguished guest for today's workshop.

Mr. Muhammad Zakaullah

Senior Full Stack Software Engineer – WISETECH MEP Consultants Pvt. Ltd., Mumbai

Mr. Muhammad Zakaullah is an industry expert and a Senior Full Stack Software Engineer at WISETECH MEP Consultants Pvt. Ltd., Mumbai. As a full stack engineer, he works on every

layer of an application, from the interface the user sees to the backend services and databases behind it. That is the same end-to-end picture that Flutter and Firebase together give us.

[Optional: add a line on his years of experience, notable projects or education, if available]

He brings real industry experience of designing, building and shipping software. Today he joins us to show how professional apps are actually built. We are deeply grateful for his time and his willingness to share his knowledge with our students.

May I now request Mr. Muhammad Zakaullah to kindly take over and begin the workshop. A big round of applause, please!

(Hands-on workshop begins — Mr. Muhammad Zakaullah conducts the session)

Thank you, Sir, for that practical and engaging hands-on session. I am sure every student here now has a working Flutter and Firebase app on their laptop and a much clearer idea of how real-world apps are built.

[If time permits: "We now open the floor for a short Q&A. Students, please keep your questions brief."]

CONCLUSION

~2 min

ANCHOR

As we come to the close of today's workshop, I hope each one of you leaves with more than just code on your laptop. I hope you leave with the confidence that you can build something real.

Today you went from an empty project to an app with authentication and a live cloud database. That is the foundation of almost every app on the Play Store and App Store. Do not let the app you built today stay in this lab. Extend it, add your own features, use it in your mini-projects and hackathons, and put it in your portfolio.

Cross-platform development is not a skill for the future. It is what the industry is hiring for right now, and sessions like this one bring you a step closer to being ready for it.

VOTE OF THANKS

~3 min

ANCHOR

As we formally conclude this programme, I would like to express our heartfelt gratitude to everyone who made today's workshop a success.

We thank the management of Anjuman-I-Islam, especially our President, Dr. Zahir Kazi, for their vision and continued support for academic and industry initiatives.

Our sincere thanks to our respected Principal, Dr. Mohd Shafi Pathan Sir, for his constant encouragement and support.

We are deeply grateful to our Head of Department, Dr. Jameer Kotwal Sir, for his guidance and motivation in organizing this workshop.

A heartfelt thank you to our distinguished speaker, Mr. Muhammad Zakaullah, Senior Full Stack Software Engineer at WISETECH MEP Consultants Pvt. Ltd., for sharing his time and expertise

with our students. We also thank WISETECH MEP Consultants Pvt. Ltd. for their association with us.

We thank our workshop coordinators, Dr. Muhib Lambay Sir and Prof. Sharique Ahmad Sir, for planning and coordinating this event, along with all the faculty members, lab staff and student volunteers who worked behind the scenes to make it run smoothly.

And to every student in this lab, thank you for your presence, your patience during setup, and your enthusiasm throughout the session. We look forward to seeing the apps you build.

On this note, we formally conclude the Hands-On Workshop on Cross-Platform App Development with Flutter & Firebase. Students are welcome to approach Mr. Zakaullah with any further questions.

Thank you. JazakAllahu Khair.

Coordinators: Dr. Muhib Lambay | Prof. Sharique Ahmad · HoD: Dr. Jameer Kotwal, CSE (AIML)
